

Helping you to enhance learning
and teaching with technology

ICT Coaching for Teachers

Why use Standout Education?

The Microsoft certified trainers at Standout Education offer customised coaching programs to support teachers in their use of ICT and help to embed ICT knowledge and skills in their day-to-day practice.

What is coaching?

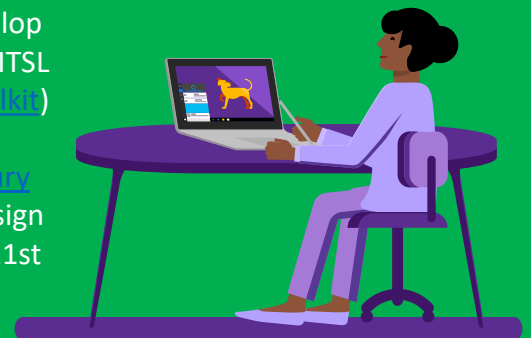

As opposed to a one-off professional development activity, coaching is a structured, sustained process for enabling the development of a specific aspect of a teacher's practice.

An ICT coaching program from Standout Education allows teachers to experience and develop understanding of the integration of ICT in the curriculum. As well as giving teachers the confidence to learn and apply new ICT skills across all learning areas.

What is the Standout Education Approach?

For ICT coaching we particularly focus on opportunities to develop ICT for learning within the Australian Curriculum. We use the AITSL Coaching and Mentoring resources (from the [AITSL Teacher Toolkit](#)) to assist with planning, delivery and evaluation of coaching sessions. To support classroom practice we use [the 21st Century Learning Design](#) (21CLD) framework which helps teachers redesign their existing lessons and learning activities to build students' 21st century skills.
