

OneNote Academy

ONE DAY WORKSHOP

OneNote is one place to create all of your lessons, one place to share with students and one place to create student portfolios, projects and collaborative class creations. Discover how to create, organise and share dynamic notebooks rich with interactive content. Bring the classroom to life with enticing audio and video features. Stay organised and on-topic using tagging, tables and tabs for new content. Easily personalise the learning experience with Class Notebook, which provides each student with their own private notebook.

Learn how to:

- Use OneNote paired with the free tools provided within the Microsoft Community to digitise lessons and create meaningful lesson springboards in the collaboration space of OneNote Class Notebook.
- Provide guided and levelled practice using the content library and link your students directly to the web.
- Incorporate screen clippings, hyperlinks and digital inking to bring new dimensions to basic assignments.
- Explore free resources from the Microsoft Community and expand your capabilities and educational offerings.
