

Standout Education provides quality incursions for K-12 students in WA, offering tailored curriculum-aligned experiences.

Contact us to discuss your requirements.

Minecraft Education

Explore the creative and immersive environment of Minecraft Education in our hands-on workshops for students of all levels of experience. Popular themes include:

- Cybersafety
- Coding
- Cross-curricular integration

Artificial Intelligence (AI)

Introduce your students to the exciting and rapidly evolving world of AI. Students will discover what AI is, how it works and how to use it safely and responsibly. We explore how AI can enhance their learning and help them make a positive difference in the world.

Design Thinking

Engage students in a fun, collaborative and inclusive workshop, using the design thinking process to solve real world problems. Students will define their own problems, generate ideas, prototype and test their solutions with feedback.

Microsoft 365

Provide students with the skills needed to simplify their lives, increase productivity and improve academic performance. Discover the educational benefit of Microsoft apps, including:

- **OneNote** - as a digital workspace and collaboration tool
- **Teams** - meet, share and chat with your teachers and classmates
- **PowerPoint, Word, Excel** - do more with Microsoft Office
